Chairman's Message

Dear friends,

Wish you a very Happy New Year!

Let me share some data which are good to know for our industry.

During April to October 2018, Plastic export from India stood at US\$ 3.47 billion (Source: Directorate General of Commercial Intelligence & statistics-DGCIS), Out of this five top importers of Indian Plastic product were China, US, Italy, Bangladesh & UAE.

These export covers wide range of raw material, Plastic Moulded & extruded goods, Polymer films, Moulded/Soft luggage items, Writing instruments, Plastic woven sacks & bags, Polyvinyl chloride, Leather cloth & sheeting, Packaging, Consumer goods, Sanitary fittings, Electrical accessories, Laboratory/Medical surgical ware, Tarpolins, Laminates, Fishnets, Travel ware & others.

I need not to say that our industry offers excellent potential in terms of capacity, infrastructure & skilled manpower, supported by Polymer producer & plastic processing machinery manufacturer.

Recently CII Director general said that "Better demand condition, Settled GST implementation, Capacity expansion from growing investments in infrastructure continuing positive effects of reform policies & improved credit offtake especially in service sector at 24% will sustain the robust GDP growth in the range of 7.5% in 2019. (Ref: PTI: December 31,2018)

This indeed is a news which brings cheers to the new year 2019.

Once again wishing you very Happy New Year.

Warm Regards,

Prakash Shah
Chairman

Conveyor Belt Automation for Part handling solution in IMM & BMM.

Today in the era of quality and on time delivery for any industry, plastic processors across the globe demands conceptual solution for sophisticated operations in part handling.

They always look for the solution where operations like moulded parts conveying from mould to the required place without using any manual process, in turn without any

labour. Not only this but they also wants sprue separating, sorting or counting of parts as a integral part of conveying process.

Prasad Group has range of conveyor belts to offer exact solution for Part handling & automation in IMM & BMM. These conveyors with auxiliaries like Carousels & separators are manufactured in India in joint venture with CRIZAF SP - Italy.

On line part conveying, runner separation & online grinding for sprue recovery

Conveyor Belt and Carousels with built-in PLC and counting system

Types of Conveyor Belts

- Plastic Carpet Conveyor Belt - We have our Patented Technology
- PU conveyor belt
- PVC Conveyor belt

Types of Separators

- Drum Type Separator
- Roller Type Separator

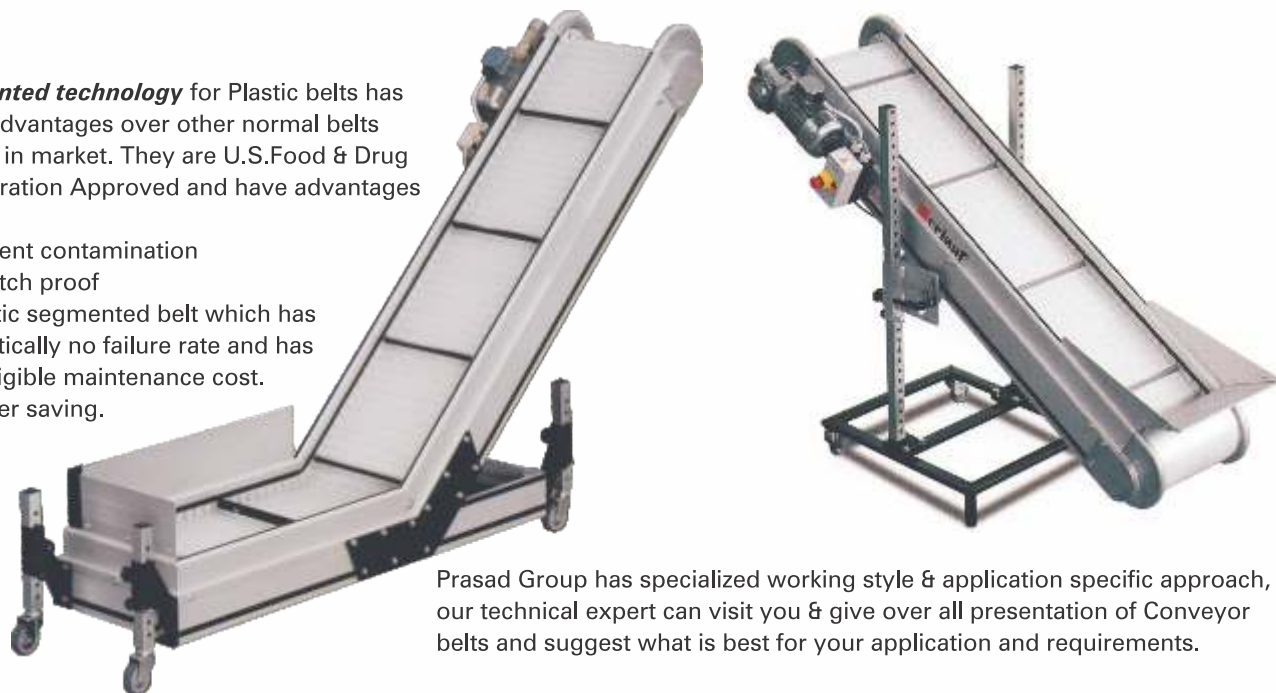

Types of Carousels

- Box Type
- Bag Type

These belts, Separators & Carousels are mainly used for application like Pet Preforms, Cap & closers, Automotive parts, Engineering parts, Electrical parts, Medical parts etc and also for Blow moulding pinch off collection and its grinding application.

Our **patented technology** for Plastic belts has distinct advantages over other normal belts available in market. They are U.S.Food & Drug Administration Approved and have advantages like,

- Prevent contamination
- Scratch proof
- Plastic segmented belt which has practically no failure rate and has negligible maintenance cost.
- Power saving.

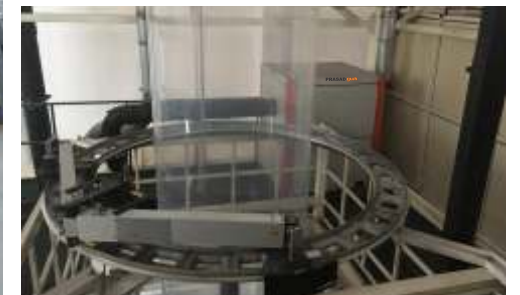

Prasad Group has specialized working style & application specific approach, our technical expert can visit you & give over all presentation of Conveyor belts and suggest what is best for your application and requirements.

"Parikh Packaging Pvt. Ltd. "- Established in 1999, is the flagship company of, 70 year old Parikh Group which was incepted in 1940.

In 2013, this Ahmedabad based packaging plant joined Constantia Flexibles which is world's fourth largest manufacturer of flexible packaging solutions. The group serves numerous multinational corporations and local market leaders.

Under the guiding principle of 'People, Passion, Packaging', around 8,298 employees produce tailor-made packaging solutions at 40 locations in 18 countries. Numerous international companies and local market leaders from the Food and Pharmaceuticals business sectors use their sustainable and innovative products.

In India they are the third largest flexible manufacturing company with a total operation of 925 Cr. annually. They specialise in sustainable packaging solutions. Their product range includes stand up pouches, single unit shampoo sachets & different roll stock laminate materials.

Mr.Pavan Parikh
Managing Director
Parikh Packaging Pvt. Ltd.

We are associated with Prasad group since 2006. Over the period we have added Prasad equipment like, 6 Recipe Octopus, EPC & Screw dosers, Central

material conveying system, Silo & silo feeding system, Air chillers, Water chillers & Split air chillers, Multi component gravimetric dosing systems. We would like to mention that Prasad Group has played significant roll in our expansion

and growth. Also they have given many solutions for the material saving, minimize manual operations & energy saving concepts which is one of the great factor for our continual association.

We appreciate their involvement right from the understanding our needs to the supply and also see that our operations are trouble free and get performance as expected.

We wish them best of luck for the years to come.
