June 2009

## From the Chairman's Desk

Dear Friends,

I begin with wishing you the very best for the financial year April 2009-May 2010. We, at Prasad Group, earnestly hope that this year brings you immense success.

The Plastindia 2009, indeed brought the plastic industry together. It provided a wonderful opportunity to showcase our innovative products to visitors from across the world. It was a matter of pride for us to see our more than 150 equipments as part of the installations of over 25 Indian and European machinery manufacturers.

Our partner companies, Koch Technik, GWK, Crizaf, Ariostea, Rapid, were ably represented by their respective teams. This helped us offer our visitors the right advice and suggestions that took into consideration local and global aspects.

Once again, my best wishes for the future ahead.

Prakash Shah

Plastindia 2009

The energetic atmosphere at Plastindia could be felt as representatives of Prasad Group engaged visitors in lively discussions about products and the industry scenario while answering their queries.

Prasad Group's presence was felt across Plastindia, thanks not only to its wonderful exhibition but its state-of-the-art machinery as well. Prasad's products were on the platforms of innumerable exhibitors, due to their wide-range of applications, as displayed in the images below. This is a testimony to its commitment to offering customer-centric, innovative and cost-effective products.

▲ **Material Mixing & GSM Control:** Online EPC – Gravimetric GSM Control System automate material conveying, feeding and controlling in one go with unique user-friendly touch screen. Each layer throughput is precisely monitored and controlled.

▲ **Installation with tape plant:** Multi component gravimetric dosing & mixing system ensure very accurate & consistent feeding of all materials. Central screw chiller circulate chilled water to entire plant & help to maintain quality & output of tapes. Prasad silo and silo feeding system save space, eliminate labour and contamination as well as control inventory.

▲ **Direct Air Chillers** for blown film plant, gives uniform air temperature through out the day & lower air temperature at reduce power cost.

▲ **Conveyor belt under ISBM** This parts conveying system is completely untouched by humans and transfer bottles to packing area. It also fulfill clean room condition.

▲ **Conveyor belt under Injection Moulding** Inline Small Conveyor Belt to transfer multi cavity parts to prevent damage.

# *proud association - Shree Naina Group*

A leading name in the plastic industry, providing cutting-edge packaging solutions in the PET segment.

The group, based in Baddi, Himachal Pradesh, is equipped hi-tech manufacturing facility spread over an area of 65,000 sq.ft. It manufactures more than 3,000 lakh PET bottles & one crore PET jars annually. The philosophy of placing plastic industry at the highest standards with continuously adopting best international manufacturing standards is the commitment of the group.

“Our association with Prasad Group began in 2004 with the purchase of a small capacity chiller. Today it has grown to the extent that all our auxiliary equipments are sourced from this company.

Whenever we required Dehumidifiers, Chillers, Mould Temperature Controllers, during our expansion, Prasad Group always proved to be the best partner for us. Its strong quality commitment, service support and customer friendly approaches are the major reasons for us to be with Prasad Group, always. Be it any stringent process or quality requirements, Prasad's equipments have always proven to be the right selection for us. Surely, this relationship will become stronger in the years to come.”
