updates

March 2010

From the Chairman's Desk

Dear Friends,

The success of Plexpo 2010 set the tone for wonderful year ahead for the plastic industry. I take this opportunity to wish all of you the very best of 2010.

Looking back we had quiet a satisfying year and we hope to further improve our position in the global market. Our strong belief in innovation and client satisfaction helped us remain at the forefront. Following the same philosophy we intend to contribute to the development and progress of the industry in the years to come.

The focus for the coming years would be total turnkey solutions for critical applications. Handling bigger project needs individual attention & rich experience blended with strong knowledge base.

This 'Updates' shows both glimpses of Plexpo 2010 & synopsis of our recent project at Connectwell- India's most sophisticated shop for moulding terminal blocks.

I am sure you will enjoy reading 'Updates'.

Prakash Shah

Plexpo 2010

▲ **Water Chiller** with bag making machine for better quality and productivity

▲ **Hopper Loader** on high output pulveriser for maximum efficiency.

▲ **Gravimetric Dosing Mixing System** for drip line extruder for very accurate and consistent feeding of all materials

▲ **Water Chiller, Hot Air Dryer & Conveying System** on multi layer film plant

▲ **Water Chiller** with multi filament plant for consistent throughput.

▲ PRASAD Team @ Plexpo 2010

proud association - **CW connectwell** *...The Right Connection*

One of the leading manufacturers of Terminal Blocks, Connectwell was established in 1978.

In the last three decades, the product range of Connectwell has increased from Single Feed Terminal Block to numerous variants of Terminal Blocks with a wide range of Interface Modules and complex functionalities. Connectwell has obtained Certificates and Approvals from reputed agencies such as UL, CSA, VDE, SEMKO, TUV and CE, because of its superior quality products and prompt service.

Multiple products & wide range of colours produced in one shop with central feeding system which is flexible, dust free & consistent in operation.

Central drying system which is gentle to raw material, tough to moisture & economical in energy conservation.

Silo storage & feeding with material consumption monitoring system

Vijay Saheta, *M.D.*
Connectwell Industries Pvt. Ltd.

Connectwell and Prasad's relationship goes back to the years when both the companies were quite small in terms of the scale of operations.

Prasad helped us plan and select the equipment required for our processes which ensured a high value, low cost solution. Working with engineers from Prasad was like working with our very own team as they were always concerned about the value that each and every equipment was delivering to our process.

The integration of these various equipments has been done successfully ensuring that only 6 people on the Connectwell shop floor are able to handle 22 moulding machines. There are plans to expand the shop floor to 28 machines very shortly without increasing the work force for the same.

In closing I would like to State that Prasad has lived up to its expectations in delivering a high value, cost effective solution ensuring that they will always remain a preferred supplier to us in all the years to come.
