

Prasad at Arabplast 2019, Dubai

Prasad at Indiaplast 2019, Noida

Chairman's Message

Dear friends,

I am happy to share that for the Year 2018-19 Prasad Group has grown by around 13%.

We enhanced manufacturing capacity of all the group companies and also introduced new technology & models for Chillers, Granulators, Conveyor Belts, Robots and technology for our loading & drying solutions, last year.

Friends, keeping our tradition, we had our annual sales conference in April'19. Apart from business discussion and future planning, we had interesting program for our sales & operation team on 'Happy Communication' and 'Life is Beautiful'.

We believe that our customers & suppliers are our strategic partners & hence, I wish to share something about our CSR activity. Prasad Group is actively involved in upliftment of needy communities in several districts of Gujarat & Bihar through its close linkage with various NGOs & Charitable trusts. This year, we extend our horizon in all the states of our country.

The activity includes providing primary education, health services, rural upliftment and women empowerment.

Warm Regards,

Prakash Shah
Chairman

Unique Shredder & Granulator combo in one compact machine

Raptor DUO Shredder

We can feed Plastic lumps to Shredder and directly get granules from the bottom Granulator.

- Quadcut knife system with 4 cutting edges for prolonged life
- Smaller motors for significant energy savings (11-45 kW)
- Top, Power & Flexi-Pusher power aids for maximised outputs
- Open-heart technology for simple, quick and easy opening & cleaning

Open-Heart Granulators 500 & 600 Series

Pipe up to 300mm diameter, 30mm thickness and 3000mm length of HDPE, PVC, CPVC can be directly fed to Granulator and get the granules of the desired size.

- Quick & easy access to knives and cutting chamber
- Unique double-scissor cutting technique for maximised output. Also, helps with prevention of dust generation
- Smaller motors for reduced energy consumption
- Power assisted opening & closing of hopper
- Tangential and Super-Tangential cutter-house configurations
- Safest granulators to operate

Pipe feeding system

TENTY GROUP, its inception took place in the year 1979 under the flagship company M/S. Excellent Moulders. It has its base in Kolkata; with its main unit and functions duly certified as per ISO 9001-2018. The plastic products that the Company manufacture are in the field of Writing Instruments, Caps and Closures, Fans Components, FMCG caps, closures & bottles and PET preforms.

Presently, the Group is manufacturing/operating across India with 6 factories in Kolkata measuring more than 175000 square feet in totality. It is operating through advanced/ automated machineries and processes.

It also has its presence in Noida, Haridwar, Hyderabad and Guwahati.

In terms of manufacturing plastic products, it is one of the biggest Groups in India.

Director
Tenty Group

Tenty Group Tenty

We have been associated with Prasad Group since 2000, and are using their various auxiliary equipments such as Chiller, MTC, MSP,

Online Granulators, Mould descaling, Metal Separator, Volumetric Dosing & Mixing, Hot Air Dryer and Online Conveyor for Finished Goods.

The equipments that Prasad Group provides are highly reliable in terms of quality which helps us in producing quality materials effectively and efficiently. Also, it helps us to reduce manpower.

Prasad Group has always supplied the best quality machineries with time bound delivery. To top it all, they offer brilliant service support and excellent communication and teamwork.

We are highly impressed with their mannerism, detailing and accountability demonstrated for each and every project.

Looking forward towards a continuous and a prosperous growth for both the groups.
