Chairman's Message

Dear Friends,

With economic slow down and ban on single use plastics getting real, industry sentiments are quite a fearful. On other side international resources show opposite scenario and aspired future.

The out look for country's manufacturing sector wise quarterly survey released by FICCI in June '19 showed that electronics & electrical manufacturing sector will grow at high rate. Textiles, chemicals (our industry falls under this sector), fertilizers and pharmaceuticals, capital goods, paper products, cement and ceramics are expected to register moderate growth while automotive, metal and metal products, medical devices and leather and footwear are expected to register low growth.

Industry is ready to take any challenge and can adapt such ban on plastics but expect government to enforce law equally across the country. If ban is implemented fair way across the country, we can turn challenges into an opportunity.

K-2019, one of the foremost events world wide, provides an opportunity to manufacturer & suppliers of plastic & rubber product and machinery to exhibit their products and services internationally. This time the focus would be on Industry 4.0, Green Energy and Recycling. Looking forward to see all of you over there.

Best Wishes.

Warm Regards,

Prakash Shah  
Chairman

iPLEX Exhibition, Bangalore

HSIL Limited, vastly recognized by its brand Hindware, a leading name in the Indian market is a company driven by innovation.

Set up in 1960 as Hindustan Twyford Ltd, with a technological collaboration with Twyford UK, the company was renamed to Hindustan Sanitaryware & Industries Limited in 1969 and has since been popularly known as 'HSIL'.

HSIL Limited is among India's top 500 companies as listed in the 'Fortune India 500' 2014 list.

HSIL Ltd known for its Hindware range of products has ventured into manufacturing and supply of plastic pipes and fittings. A newly launched pipes product division branded as "Truflo by hindware" specially to manufacture & Supply CPVC, UPVC, SWR & PVC pressure plastic pipes and fittings operating from Hyderabad, Telangana to cater the need of various sectors like construction, Agriculture, Industrial etc.

The Truflo Pipes division factory, Isnapur, Sangareddy is the first of its kind manufacturing facility in the state and currently has a total production capacity of 30,000 metric tonnes with plans to scale up the production capacity to up to 60,000 MT by 2020 in order to emerge as a key player in the Pipes Industry.

The manufacturing facility is also compliant with the green building norms laid down by IGBC and rated as Green Platinum factory which is first in the industry

HSIL Limited - Pipes Division

In our Pipes & Fittings plant, Hi-End Automation for storage, batch making and feeding of raw material is from Prasad Group.

Our goal was to select vendor who can design, supply, install and commission the complete project effectively and efficiently so that while in operation the plant remains clean and to ensure no production loss due to automation failure. I do not hesitate to say we have achieved our goal. Prasad team has incorporated the design of automation as per our plant design which came out very well.

I would like to mention that, we have got an excellent support from Prasad team right from design of automation to the commissioning of project. Post commissioning, service team also gave an incredible service support for past two years.

Prasad group has fantastic support team, keep up the same support. This will help both Prasad Group and the customer to grow together.

Prasad's Equipments are very good and operating well. Prasad can still explore for adaption of new technology & upgradation of Existing designs. Technology upgradation and efficiency improvement will always give benefit to the customer.

Keep up the good work and wish Prasad team all the best.
